

1.Distributing Leads Evenly Among Sales Representatives:

2.Extracting Keywords from the "Comments" Field:

3.Automating Follow-Up Reminders with Google Calendar

The screenshot displays the Zapier web interface. At the top, the header shows the Zapier logo, the user's name 'ANBUKUMAR...', the current Zap name 'Untitled Zap', and the status '110%' with a 'Help' link. Below the header, a notification bar indicates 'v1.1 is in use by ANBUKUMAR 3 hours ago'. The main workspace shows a Zap workflow with three steps: 1. New Form Response (Google Forms), 2. Update Spreadsheet Row(s) (Google Sheets), and 3. Update Spreadsheet Row (Google Sheets). The third step is highlighted with a blue border. To the right, a configuration panel for the '3. Update Spreadsheet Row' step is open, showing settings for 'Setup', 'Configure', and 'Test'. The 'Configure' tab is active, displaying 'My Google Drive' for the Drive, 'Technova-Solutions-Lead Capture Form' for the Spreadsheet, 'Sheet1' for the Worksheet, and '1. Response Id: xJAPLB_DDSs' for the Row.
